Keeping in touch is vital in today's challenging business environment. Increasingly, we are travelling more, communicating more and operating globally. Gold Card is one of the most powerful communications accessories you can choose for your notebook or palmtop computer.

◀ Ready to perform

For many years Gold Cards have been at the top of independent performance reviews. The Gold Card Global series now features 33.6Kbps and 56Kbps versions so now you can choose the data speed that matches your needs. Gold Card Global uses K56flex, a high performance technology that looks to be the future of 56Kbps modems. The ITU* will formalise 56K operation in 1998 and Gold Card is ready to adopt the future standard by means of its flash memory upgrading capability.

◀ Ready to travel

Gold Card Global features a built-in line interface that's designed to be approved in every country of the world. Using our EasySwitch software application you'll find Gold Card is quick and easy to use wherever you go. Gold Card is now protected from digital PBX equipment – which can cause serious damage to modems. DigiSense uses active digital line sensing to recognise these lines, making you aware of the risk before damage can occur.

◀ Ready for GSM

Gold Card Global is ready to deliver complete GSM fax and data communications. Gold Card makes it simple - just plug in your mobile phone and you're ready for data on the move. To upgrade to GSM simply purchase the GSM Upgrade Pack for your mobile phone.

◀ Ready to upgrade

With 2Mb of flash memory you can easily upgrade to new standards and facilities. When you're ready, our Windows™ software application lets you upgrade your Gold Card with the minimum of fuss.

Gold Card Global from Psion Dacom - it's ready for anything and ready for you.

GOLD CARD GLOBAL

---

* International Telecommunications Union, the ITU-T committee is expected to ratify the 56Kbps modem recommendation in 1998.

Six reasons why you should invest in Gold Card Global from Psion Dacom.

◀ **24 carat quality**

With its durable gold plated casing and robust connectors, Gold Card Global will survive the rigours of everyday use. Manufactured in Europe under an ISO 9002 quality management system, your Gold Card won't let you down - and it's guaranteed for life.

◀ **Investment protection**

Gold Card Global is sophisticated enough to satisfy your needs today and in the future, thanks to its 2Mb of flash memory. Easily download updated features, functions and speeds.

◀ **Universal acceptance**

Gold Card Global is currently PTT approved in 22 countries and may be used throughout the world.

◀ **Mobile communications**

With the optional GSM Upgrade Packs you can exchange email, send and receive faxes and connect to the Internet in countries offering GSM or digital cellular data services.

◀ **Total package**

Gold Card Global is complete with fax and communications software, Internet access packages, point enabler and handy drivers, saving you both time and money.
